Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Figures 2 and 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7, 9-15, 17-23 and 25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ishimatsu '442.

4. Claims 1-25 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kamp '268.

Art Unit: 3727

5. Claims 1-4, 6-12, 14-20 and 22-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gould '911.

6. Claims 1-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Johnson '329.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 26 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishimatsu, Kamp, Gould, Johnson and Custer et al. '380.

Ishimatsu, Kamp, Gould and Johnson each disclose the claimed device except for the step of guiding the edges of the zipper profiles to a desired location between first and second bag films with guides. Custer et al. discloses that it is known in the art to guide an analogous zipper profiles to a desired location between first and second bag films using guides. It would have been obvious to one having ordinary skill in the art at the time the invention was made to guide the zipper profiles of Ishimatsu, Kamp, Gould or Johnson to a desired location between first and second bag films using guides as taught by Custer et al. for the purpose of assuring proper application of the zipper profiles to the first and second bag films.

Regarding claim 27, Ishimatsu, Kamp, Gould, Johnson and Custer et al. disclose the device, as discussed above, except for the guides having ends that are inverted arrow shaped. It would have been an obvious matter of design choice to make the ends of the Custer et al. guides an inverted arrow shape of whatever form or shape was desired or expedient. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
